Alfiafyvet – Odoo 20

DES00139 **alfiafy_partner_sourcing**: Partner vs. Outside Sourcing Traceability

Build and test report · 4 November 2026 · AGM Global Services
Repository folder: `testalfiafyvet/alfiafy_partner_sourcing` · Test database: `alfiafy20_test`

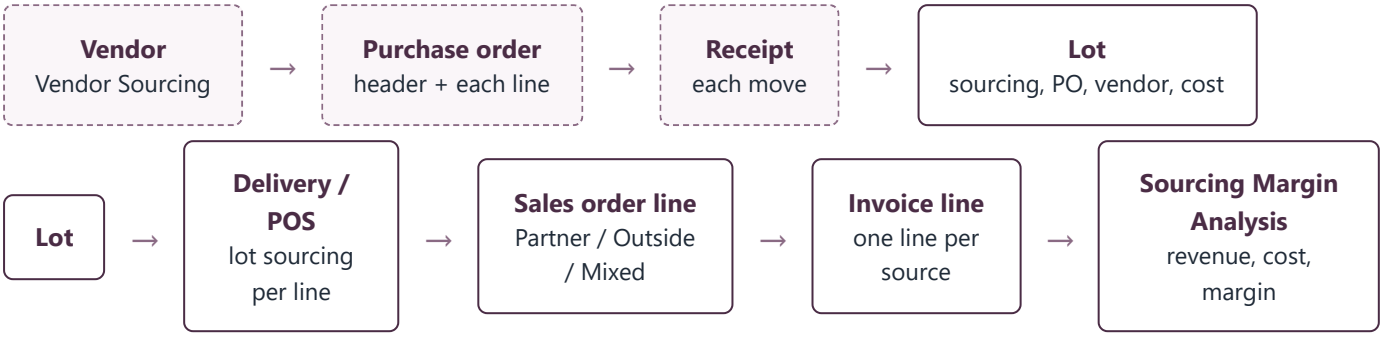

1
new module (DES00139) built on alfiafy_purchase

9 / 9
automated tests of the module passed (plan tests 8.1–8.4 + 5)

10 / 10
checks on the screens (purchase → POS → report)

38.18 / 49.09
margin % Official Partner / Outside for the same product in the test

Where the sourcing is recorded

Dashed boxes existed in alfiafy_purchase (DES00137); this module adds the rest and the report. The goal (BRD 1.4 #6, customization #30): goods bought from Official Partners and from Outside local suppliers are told apart from purchase to sale, so the margin of the same product can be compared by source.

What was done

- Built `alfiafy_partner_sourcing` from the implementation plan (phases 1–8), on top of `alfiafy_purchase`, which already had vendor, purchase order, receipt and lot sourcing with the same field names.
- Each lot keeps its source, origin purchase order, vendor and purchase cost. The source follows the lot to deliveries, sales order lines, customer invoices and POS orders.
- A sales line delivered from lots of both sources is invoiced as one line per source (plan test 8.3: 10 partner + 5 outside).
- New report Invoicing > Reporting > **Sourcing Margin Analysis** (pivot, graph, list): revenue, cost of goods sold, gross profit and margin % by sourcing and product.
- Ran the plan tests as automated tests and the whole flow on the test database (screenshots in this report). Two problems found while preparing this report were fixed (section 5).

1. Module and plan coverage

Module	Ref.	Status	Version	Depends on
alfiafy_partner_sourcing Alfiafy Partner vs. Outside Sourcing Traceability	DES00139	New	20.0.1.0.0	purchase, stock, sale, point_of_sale, account, alfiafy_product_base (plan) + alfiafy_purchase, purchase_stock, sale_stock, pos_stock (needed in Odoo 20)

Plan item	Delivered
Phase 1: module, manifest	Category Inventory/Inventory, version 20.0.1.0.0. On install, lots already received from a purchase order get their origin PO, vendor and cost, and POS lines already sold from lots get their sourcing.
2.1 Vendor sourcing	Already in alfiafy_purchase (Sales & Purchase tab). New vendors now default to **Outside**, as the plan says.
2.2 Purchase order	Header sourcing from the vendor, editable (alfiafy_purchase). New: badge in the header and a sourcing on **each line**, taken from the header and editable until the order is confirmed.
2.3 Receipt and moves	Receipt sourcing existed. New: each receipt move takes the sourcing of its purchase line.
2.4 Lot	Sourcing (required, Outside for lots not received from a purchase order), origin purchase order, origin vendor, origin unit cost (purchase price in company currency per product unit), stamped when the lot is first received.
3.1 Delivery move lines	Each move line keeps the sourcing of its lot (stored), shown as “Lot Sourcing” in the delivery details.
3.2 Sales order line	Sourcing computed from the lots reserved or delivered: Official Partner, Outside Supplier or **Mixed**.
3.3 Invoice line	Sourcing and lot cost copied to the invoice line; a line delivered from both sources becomes one invoice line per source. Manual invoice lines: sourcing chosen by the accountant.
4.1–4.3 POS	The POS shows the sourcing of the lot chosen on the order line; the POS order line stores it; the POS invoice line carries it.
5.1–5.2 Report	SQL report `alfiafy.sourcing.margin.report`: pivot (product × sourcing, 5 measures), bar graph of gross profit by sourcing, list. Menu Invoicing > Reporting > Sourcing Margin Analysis.
Phase 6: views	Vendor form, purchase order header and lines, lot form and list, invoice lines (plan). Also: sales order lines, delivery details, moves history, POS order lines.
Phase 7: access	Read access to the report for Invoicing users and Accounting managers (`security/ir.access.csv` , the Odoo 20 format).
Phase 8: tests	8.1–8.4 as automated tests, plus partial invoices, manual invoice line and three POS tests (section 4).

2. How cost and margin are computed

When a lot is first received from a purchase order, it stores the **purchase cost** of that receipt (unit price of the purchase line, in company currency, per product unit). When the lot is sold, the sourcing and that cost are copied to the invoice line or POS line. The report then computes, per line:

Measure	Calculation
Quantity Sold	Quantity in the product unit (a Box of 10 counts as 10). Credit notes and POS refunds are negative.
Revenue	Invoice line amount without tax, in company currency (credit notes negative). For POS orders not invoiced: POS line amount without tax.
Cost of Goods Sold	Quantity Sold × purchase cost of the lots sold. A line without a lot cost (e.g. a product without lots) uses the product cost.
Gross Profit	Revenue − Cost of Goods Sold.
Margin %	Gross Profit / Revenue × 100, computed again for every group (not the average of the lines).

The report has one row per posted customer invoice or credit note line, and one row per line of a POS order that was **not** invoiced (an invoiced POS order is counted through its invoice, so nothing is counted twice). The "Document Type" filter separates the two.

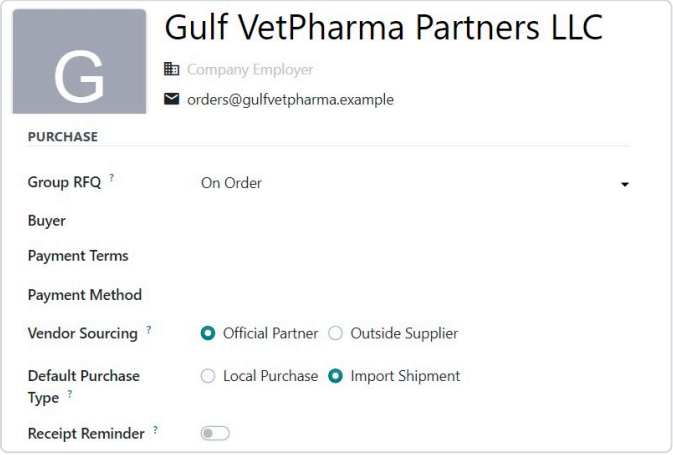

> **Same product, two sources (test scenario):** Oxytetracycline 20% LA 100 ml bought at 34.00 from the Official Partner and at 28.00 from an Outside supplier, sold at 55.00. The margin is 38.18 % on partner stock and 49.09 % on outside stock; the report shows both (section 3.8).

3. Test scenario on the screens

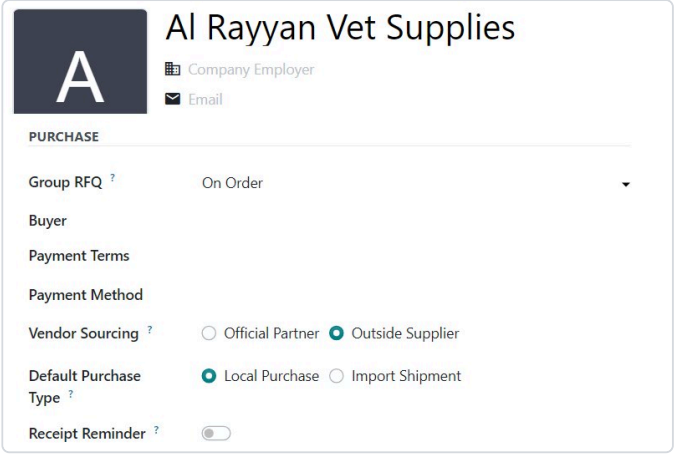

Run on `alfiafy20_test` as administrator, with the product Oxytetracycline 20% LA 100 ml (lot-tracked): one purchase from each kind of vendor, one sales order delivered from both lots and invoiced, one POS sale, then the report.

Step	Document	Result
Purchase from Official Partner	P00226, Gulf VetPharma Partners LLC, 10 Units at 34.00	Lot OXY-P-11040948 Official Partner, cost 34.00
Purchase from Outside supplier	P00227, Al Rayyan Vet Supplies, 20 Units at 28.00	Lot OXY-O-11040948 Outside Supplier, cost 28.00
Sale, delivered from both lots	S00151, Mohammed Al-Kuwari, 15 Units at 55.00; WH/OUT/00110	10 from the partner lot + 5 from the outside lot; line Mixed
Customer invoice	INV/2026/00003	10 Units Official Partner 550.00 + 5 Units Outside Supplier 275.00
POS sale	Branch 1 - Al Wakra, Umm Salal Livestock Co., 1 Unit at 55.00	Lot OXY-2605-A Official Partner shown on the line and saved
Report	Sourcing Margin Analysis	Partner 550.00 / 340.00 / 38.18 %; Outside 275.00 / 140.00 / 49.09 %

3.1 Vendors

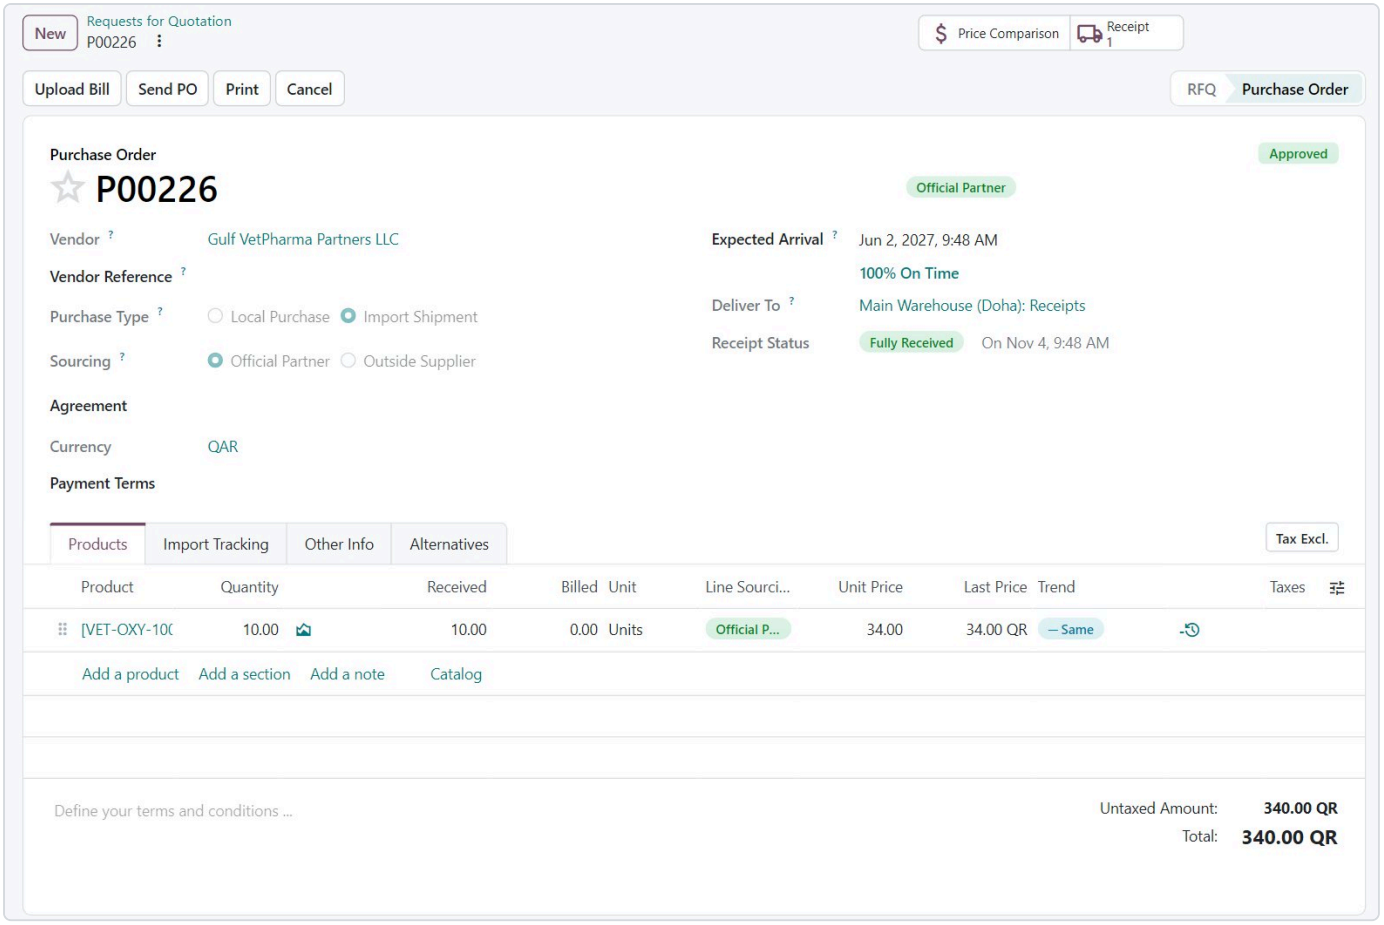

Gulf VetPharma Partners LLC: Vendor Sourcing = Official Partner (Sales & Purchase tab).

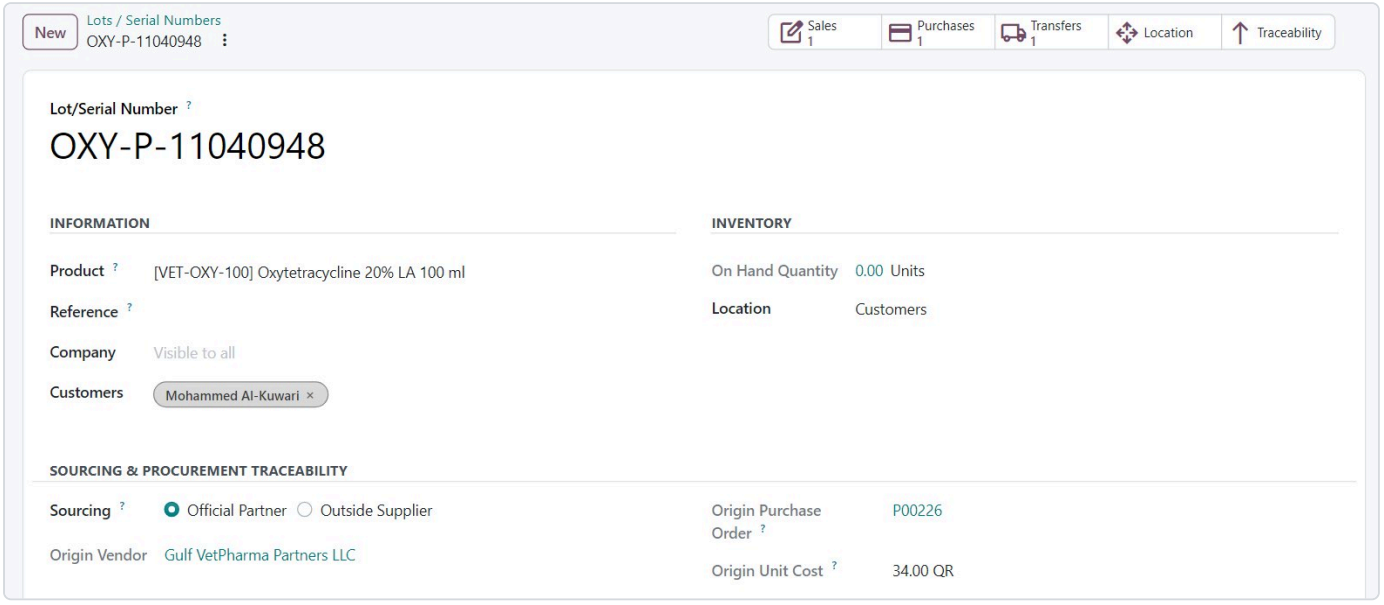

Al Rayyan Vet Supplies: Vendor Sourcing = Outside Supplier. New vendors start as Outside.

3.2 Purchase order

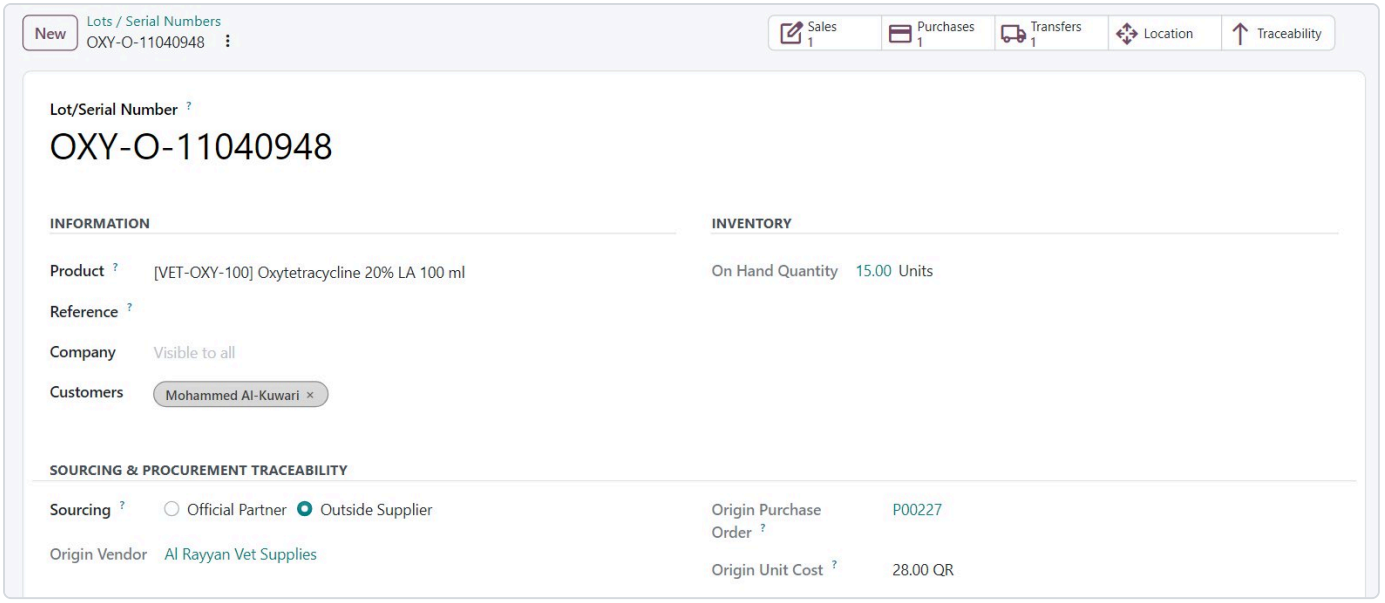

P00226: the sourcing comes from the vendor (badge "Official Partner" in the header, radio buttons editable by the buyer). The line has its own **Line Sourcing**, editable until the order is confirmed. 10 Units received.

3.3 Lots stamped at receipt

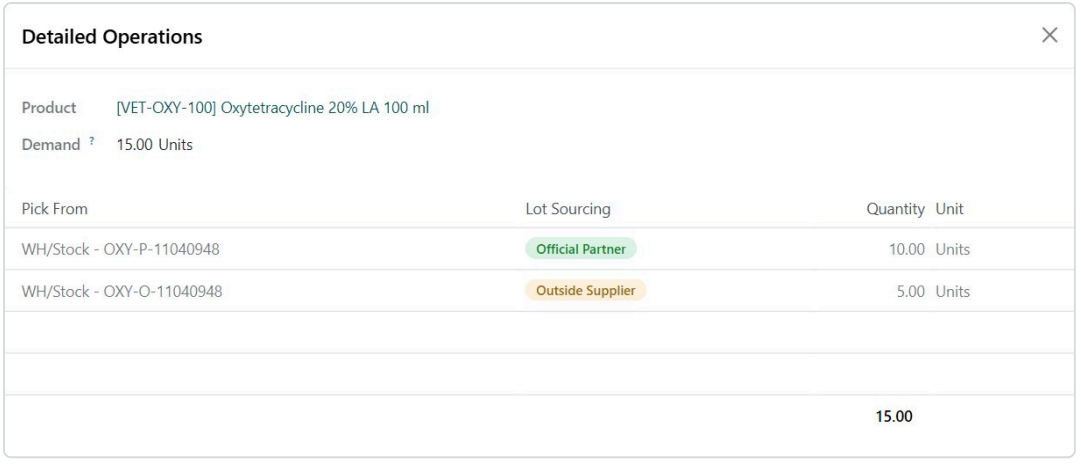

Lot OXY-P-11040948: section "Sourcing & Procurement Traceability" with Official Partner, origin vendor, origin purchase order P00226 and origin unit cost 34.00.

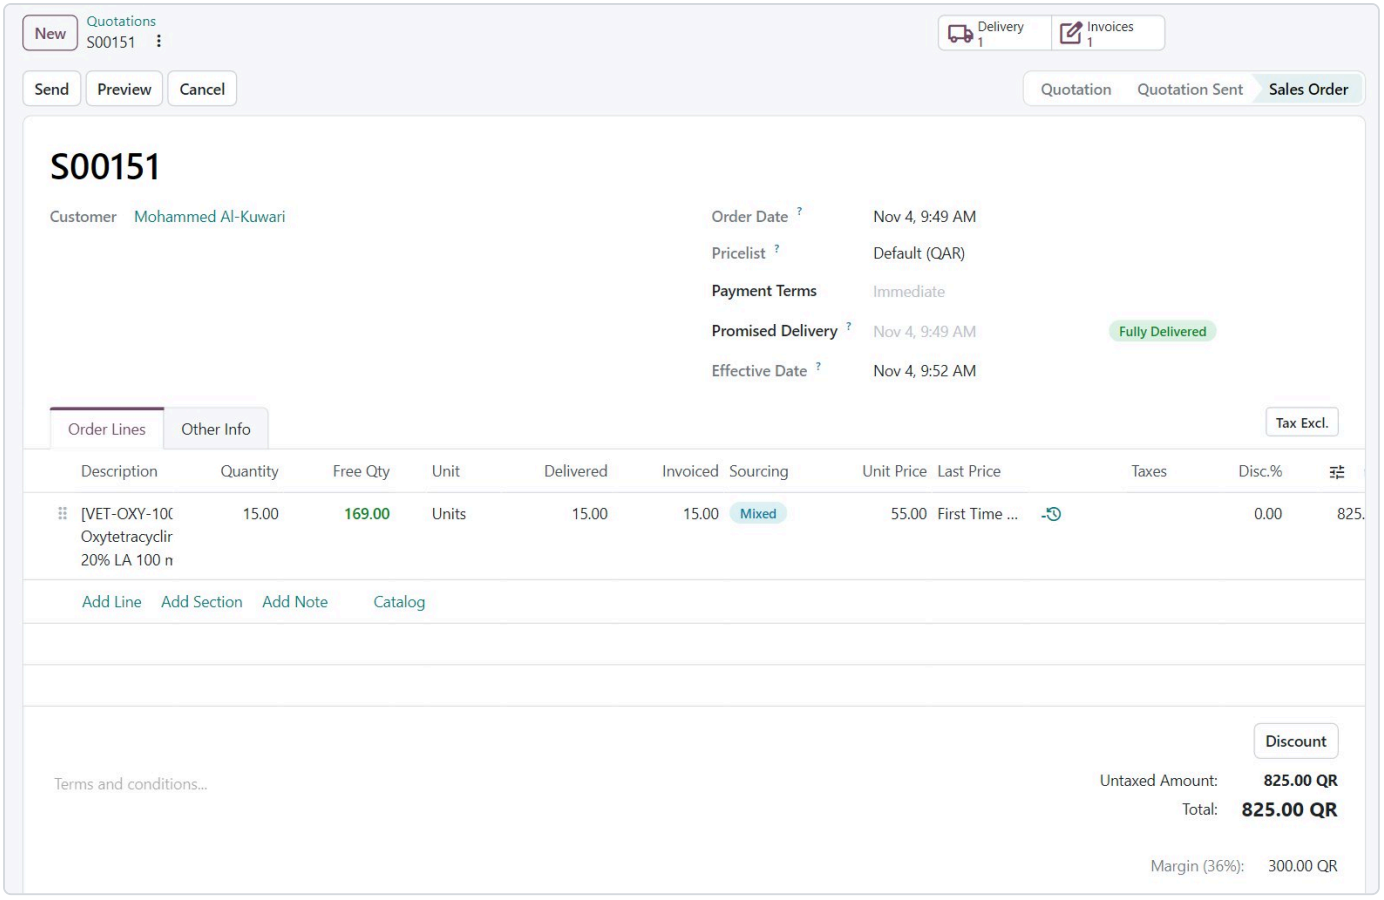

Lot OXY-O-11040948: Outside Supplier, Al Rayyan Vet Supplies, P00227, 28.00. 15 Units left after the sale below.

3.4 Delivery from both lots

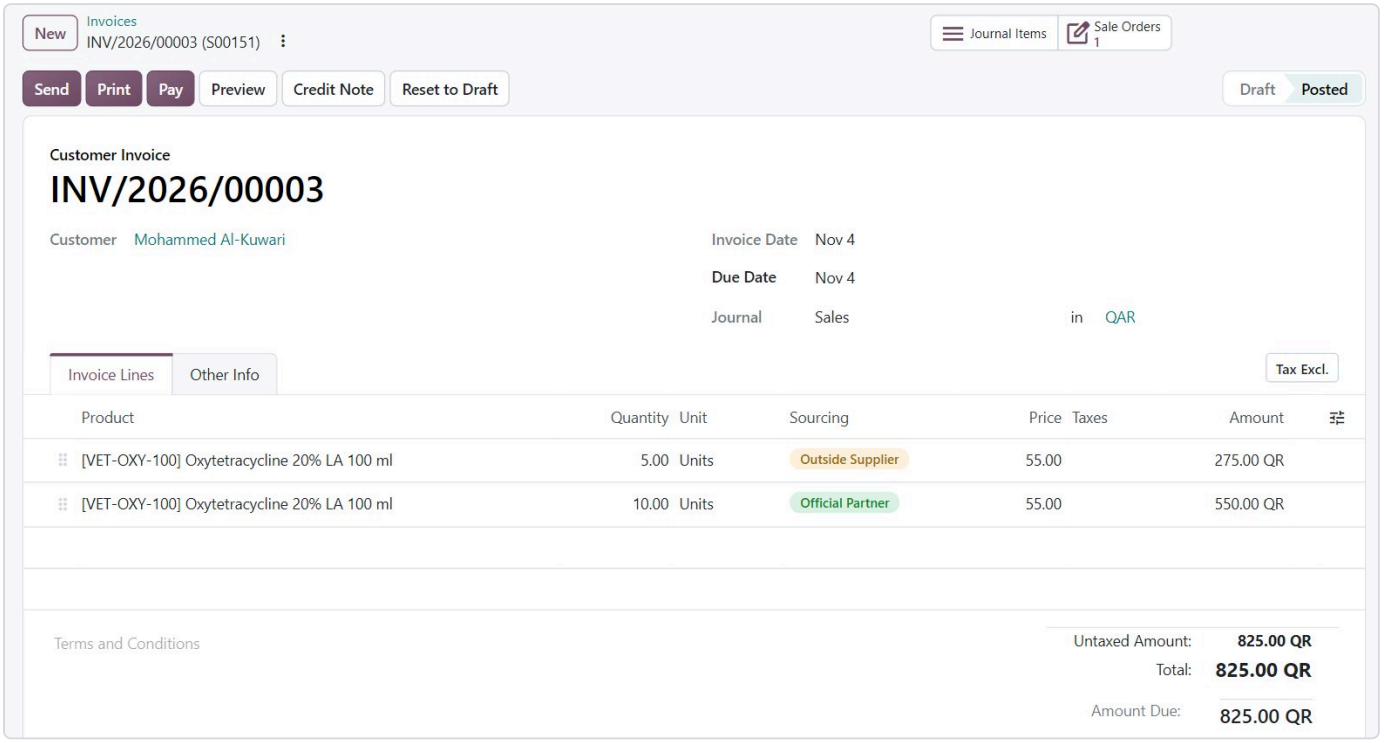

WH/OUT/00110 (from S00151), details of the move: 10 Units picked from the partner lot and 5 from the outside lot; each line shows the **Lot Sourcing**.

3.5 Sales order line

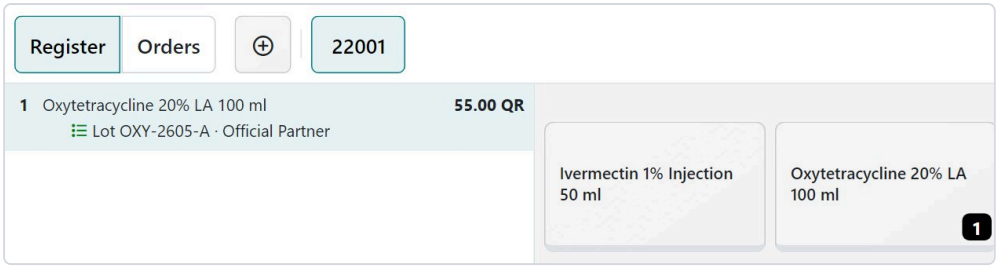

S00151: the line was delivered from both sources, so its Sourcing is **Mixed**. Delivered 15, invoiced 15.

3.6 Customer invoice split by source

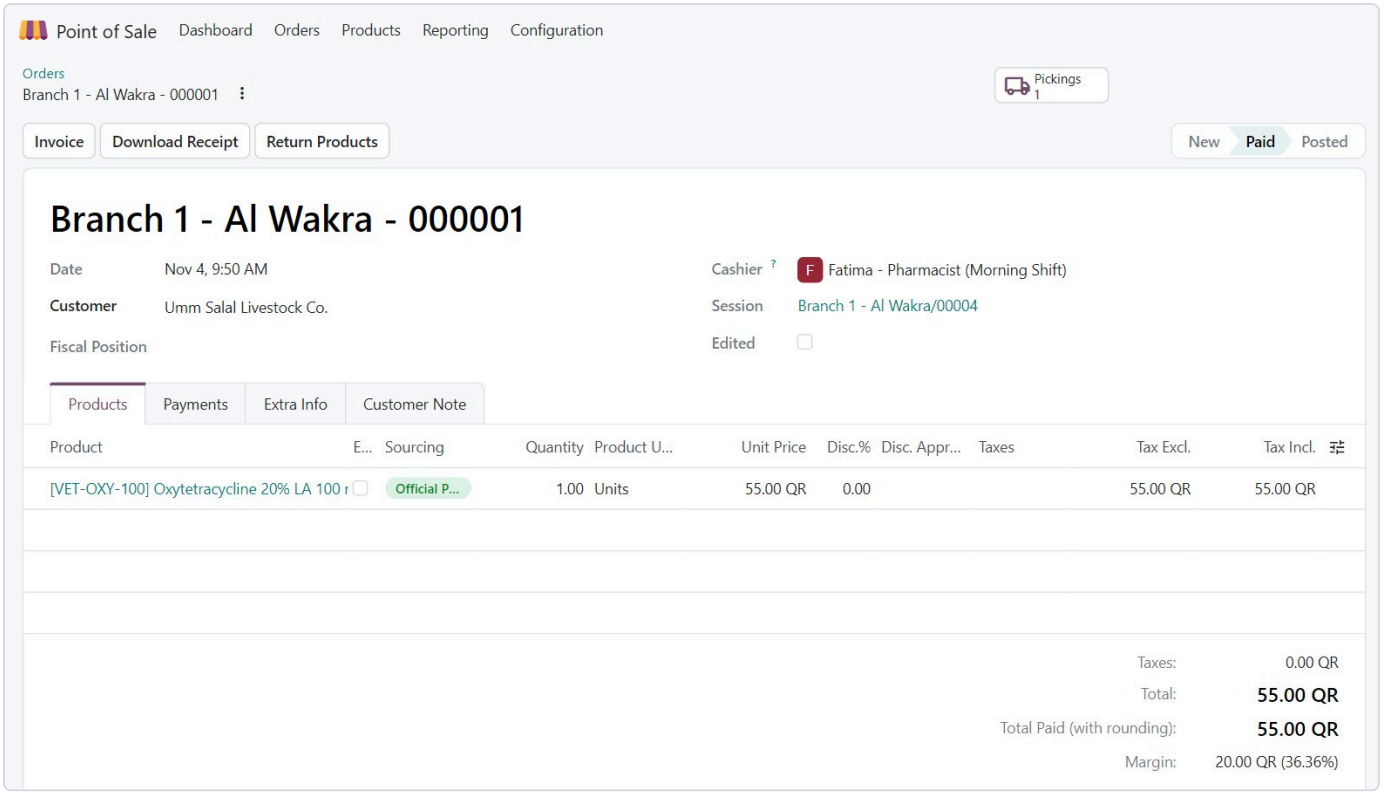

INV/2026/00003: the single sales line is invoiced as two lines, 10 Units Official Partner (550.00) and 5 Units Outside Supplier (275.00). Same total (825.00) and same price; the cost of each lot is stored on its line for the report.

3.7 POS

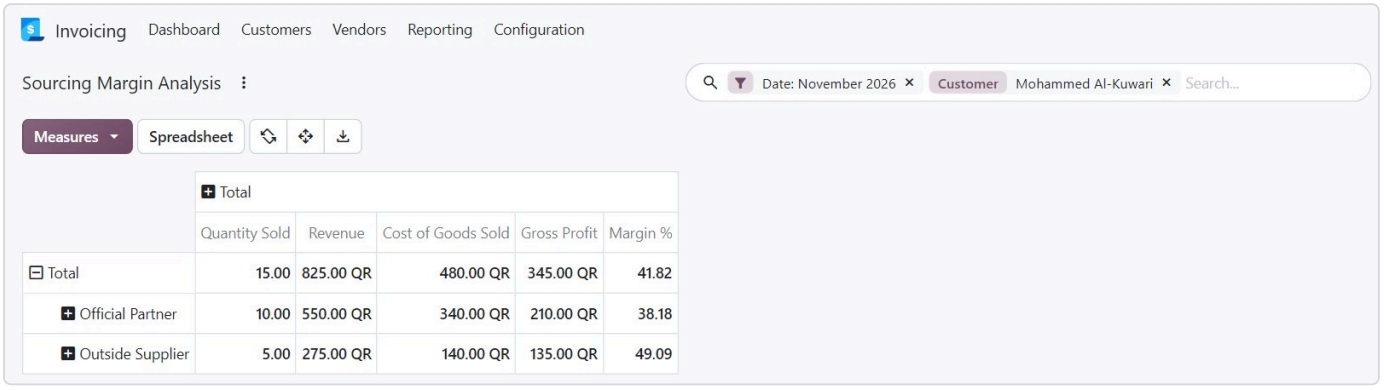

Branch 1 register: after choosing the lot, the order line shows its sourcing ("Lot OXY-2605-A · Official Partner"). This lot was received before the module was installed (P00047); its origin was filled in at install.

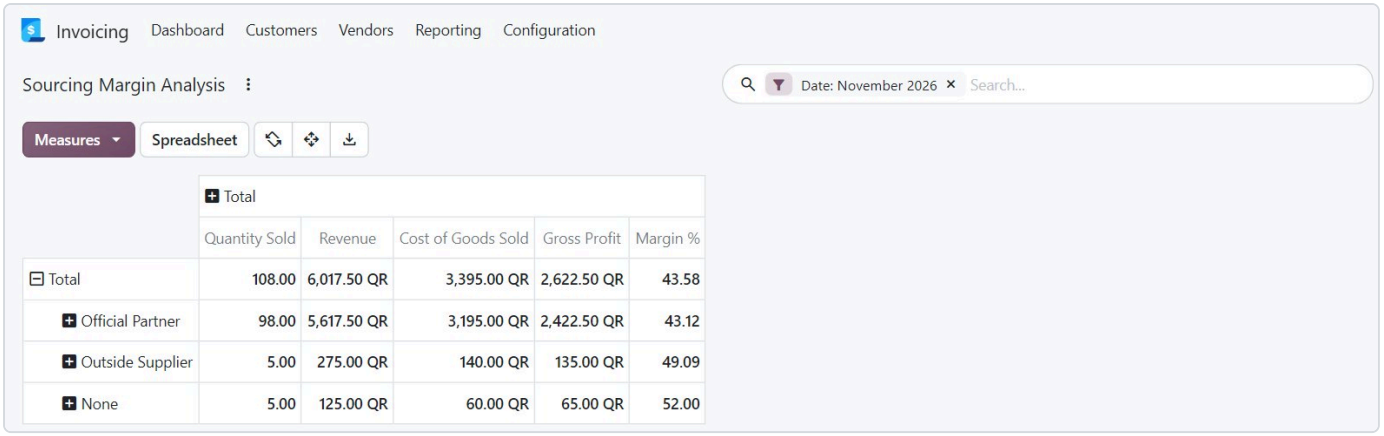

The POS order in the back office: the line is saved with Sourcing = Official Partner. If the order is invoiced, the invoice line gets it too (automated test).

3.8 Sourcing Margin Analysis

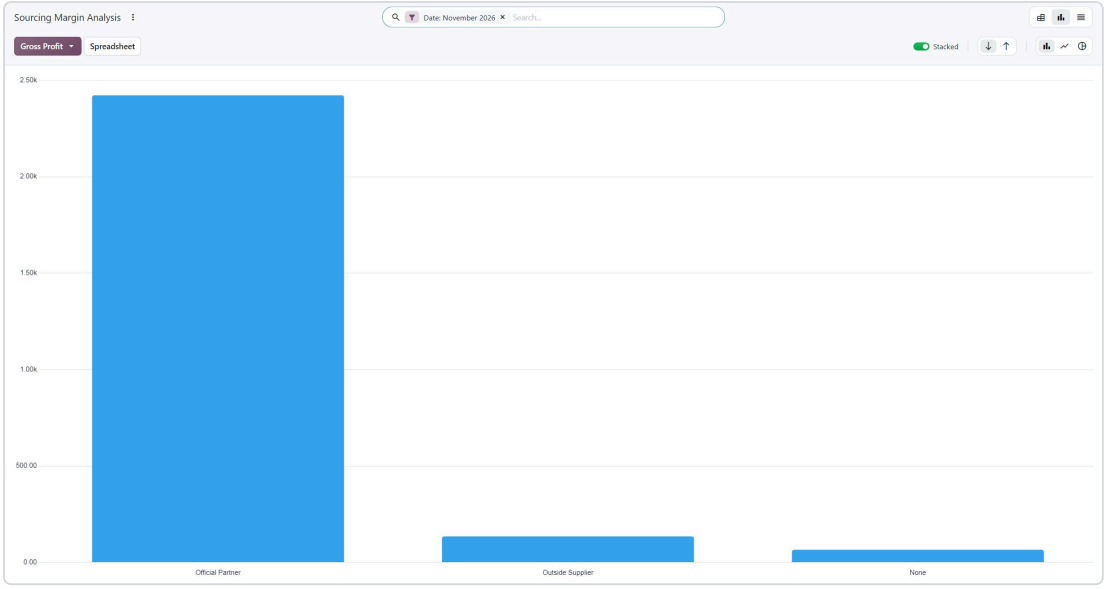

Invoice INV/2026/00003 (filter Customer = Mohammed Al-Kuwari), rows grouped by sourcing: Official Partner 550.00 revenue, 340.00 cost (10 × 34.00), 210.00 profit, **38.18 %**; Outside Supplier 275.00, 140.00 (5 × 28.00), 135.00, **49.09 %**; total 41.82 %.

	Total				
	Quantity Sold	Revenue	Cost of Goods Sold	Gross Profit	Margin %
Total	108.00	6,017.50 QR	3,395.00 QR	2,622.50 QR	43.58
Official Partner	98.00	5,617.50 QR	3,195.00 QR	2,422.50 QR	43.12
Outside Supplier	5.00	275.00 QR	140.00 QR	135.00 QR	49.09
None	5.00	125.00 QR	60.00 QR	65.00 QR	52.00

November 2026, all sales (the action opens on the current month). Official Partner also includes the POS test sales of the earlier phases, among them two early phase 3 test orders saved as 1 Unit at 500.00 (the price of a Box of 10), which show a 93 % margin: test data, not a report error. “None” is a product without lots (Hoof Pick). The default pivot shows products in rows and sourcing in columns; here the rows were regrouped by sourcing.

Graph: gross profit by sourcing for the month.

Date	Document Type	Customer	Product	Sourcing	Quantity Sold	Revenue	Cost of Goods ...	Gross Profit	Margin %
Nov 4	Customer Invoice	Mohammed Al-...	[VET-OXY-100] Oxytetracycline 20% L...	Outside ...	5.00	275.00 QR	140.00 QR	135.00 QR	49.09
Nov 4	Customer Invoice	Mohammed Al-...	[VET-OXY-100] Oxytetracycline 20% L...	Official P...	10.00	550.00 QR	340.00 QR	210.00 QR	38.18
Nov 4	POS Order (not ...	Umm Salal Lives...	[VET-OXY-100] Oxytetracycline 20% L...	Official P...	1.00	55.00 QR	35.00 QR	20.00 QR	36.36
Nov 3	POS Order (not ...	Umm Salal Lives...	[VET-OXY-100] Oxytetracycline 20% L...	Official P...	-5.00	-250.00 QR	-175.00 QR	-75.00 QR	30.00
Nov 3	POS Order (not ...	Umm Salal Lives...	[VET-OXY-100] Oxytetracycline 20% L...	Official P...	-6.00	-300.00 QR	-210.00 QR	-90.00 QR	30.00
Nov 3	POS Order (not ...	Umm Salal Lives...	[VET-OXY-100] Oxytetracycline 20% L...	Official P...	-1.00	-50.00 QR	-35.00 QR	-15.00 QR	30.00

List (extract; the Invoice and POS Order columns are left out of the picture): one row per invoice line or POS line. Top: the two lines of INV/2026/00003 and the POS sale of the scenario. Bottom: POS refunds of the earlier returns tests are negative (−5 Units: −250.00 revenue, −175.00 cost).

4. Tests

Implementation plan tests

Plan	What is checked	Automated test	On screen	Result
8.1	PO from an Official Partner → receipt → lot is partner and linked to the PO, vendor and cost	test_01	Sections 3.2, 3.3	**Pass**
8.2	PO from an Outside vendor → lot is outside and linked to the PO; line sourcing can be overridden	test_02	Section 3.3	**Pass**
8.3	Sales order delivers 10 from the partner lot + 5 from the outside lot → invoice has 10 partner + 5 outside	test_03	Sections 3.4–3.6	**Pass**
8.4	Report: revenue, cost and margin split between partner and outside (60 % / 75 %, total 65 % in the test data; credit note)	test_05	Section 3.8	**Pass**
Phase 4	POS line and POS invoice carry the lot sourcing; report includes POS orders not invoiced; POS refund is negative	POS test_01–03	Section 3.7	**Pass**

Automated tests of the module (9)

Area	Test	What it checks	Result
Purchase / sale	`test_01_inbound_partner_sourcing`	Partner PO received: lot partner, origin PO, vendor, cost 40.00	**Pass**
Purchase / sale	`test_02_inbound_outside_sourcing`	Outside PO received: lot outside; a line of a partner order set to Outside gives an outside lot	**Pass**
Purchase / sale	`test_03_sale_delivery_and_invoice_split`	Delivered 10 + 5 from both lots: line Mixed, invoice split with costs 40 / 25	**Pass**
Purchase / sale	`test_04_partial_invoices_follow_deliveries`	Two deliveries, two invoices: each invoice follows the lots delivered	**Pass**
Purchase / sale	`test_05_sourcing_margin_report`	Report by sourcing (60 % / 75 %, total 65 %); a credit note of the partner units cancels them out	**Pass**
Purchase / sale	`test_06_manual_invoice_line_sourcing`	Manual invoice line: sourcing set by hand, cost from the product	**Pass**
POS	`test_01_pos_line_and_invoice_sourcing`	POS lot sourcing lookup, POS line, POS invoice line, delivery move line	**Pass**
POS	`test_02_report_includes_pos_orders_not_invoiced`	POS order not invoiced appears in the report with its lot cost	**Pass**
POS	`test_03_report_pos_refund_is_negative`	POS refund reduces quantity, revenue and cost in the report	**Pass**

Run: `-u alfiafy_partner_sourcing --test-enable --test-tags /alfiafy_partner_sourcing` → **0 failed, 0 error(s) of 9 tests** (after the fixes of section 5). Before those fixes, the full run on the 8 project modules gave **0 failed of 47 tests**; five test classes reported a clean-up error caused by read-only files in the Windows filestore (not by the tests), and re-running those modules alone was clean. The new view and report change only affect this module.

Checks on the screens (10)

#	Check	Result
1	Vendors show Vendor Sourcing; the partner PO shows the Official Partner badge and line sourcing	**Pass**
2	Partner lot: Official Partner, P00226, Gulf VetPharma Partners LLC, cost 34.00	**Pass**
3	Outside lot: Outside Supplier, P00227, Al Rayyan Vet Supplies, cost 28.00	**Pass**
4	Delivery details show the lot sourcing of each line (10 partner, 5 outside)	**Pass**
5	Sales order line S00151 = Mixed	**Pass**
6	INV/2026/00003 split into 10 Official Partner and 5 Outside Supplier lines, total unchanged	**Pass**
7	POS line shows “Lot OXY-2605-A · Official Partner”; the saved POS line is partner	**Pass**
8	Lots received before install got their origin PO, vendor and cost (OXY-2605-A → P00047, 35.00)	**Pass**
9	Report for INV/2026/00003: partner 550 / 340 / 38.18 %, outside 275 / 140 / 49.09 %	**Pass**
10	Report: POS refunds negative; menu Invoicing > Reporting > Sourcing Margin Analysis with pivot, graph, list	**Pass**

5. Points to confirm and open items

Fixed while preparing this report

- **POS refunds in the report**: Odoo 20 stores POS line amounts as positive values (the sign comes from the quantity), so refunds were counted as positive revenue. The report now takes the sign from the quantity: a refund of 5 Units shows −250.00 revenue and −175.00 cost. A test was added (POS test_03).
- **Delivery details**: the lot sourcing was stored on each delivery line but not shown. A "Lot Sourcing" column was added to the move details, the detailed operations list and the moves history.

Where the build differs from or adds to the plan

- **Phase 2 already existed** in alfiafy_purchase (DES00137) with the same field names; this module depends on it and adds only what was missing (line and move sourcing, lot origin and cost, required lot sourcing).
- **Extra dependencies**: alfiafy_purchase, purchase_stock, sale_stock and pos_stock are needed in Odoo 20.
- **New vendors default to Outside** (plan). An alfiafy_purchase test that relied on a vendor with no sourcing now sets it to blank explicitly.
- **Lots not received from a purchase order** (e.g. opening stock) are Outside and can be changed on the lot form. In the test DB all 11 lots came from purchase orders and got their origin at install.
- **"Mixed"** on sales order and POS lines: one line can take goods from both kinds of lot.
- **Invoice split**: delivered quantities are invoiced first, then reserved ones (an invoice made before delivery uses the reserved lots). A product without lots gets no sourcing; the accountant can set it.
- **POS**: Odoo 20 does not preload lots in the POS (no `_loader_params_stock_lot`), so the sourcing is fetched when a lot is chosen. The POS line gets its sourcing when the order is saved, because the POS invoice is created during that save.
- **Cost of goods sold** uses the purchase cost of the lots sold, stored on the invoice / POS line, not a join on stock moves in the SQL (one invoice line can match several moves, which would count costs twice).
- **Report scope (addition)**: POS orders that were not invoiced are included, otherwise most retail sales would be missing. Tell us if the report should show invoices only.
- **Label**: the option stays "Outside Supplier" (plan: "Outside Local Supplier") to match what DES00137 already shows.

Open items

- **Vendors**: set Vendor Sourcing on every real vendor (Official Partner for agency suppliers). New vendors start as Outside.
- **Returns from customers** (delivery returns, credit notes): credit notes made from an invoice keep the sourcing of the invoice lines; a manual credit note needs the sourcing set by hand.
- **Test data**: the scenario added P00226, P00227, lots OXY-P-11040948 / OXY-O-11040948, S00151, WH/OUT/00110, INV/2026/00003 (posted) and one POS order on Branch 1.
- Nothing was committed or pushed to the `testalfiafyvet` repository.

How to run

Start the test server:

```
.venv20\Scripts\python.exe odoo\odoo-bin -c odoo\odoo.conf --addons-path=enterprise-20.0,odoo\addons,testalfiafyvet -d alfiafy20_test -p 8021
```

Logins: `admin / admin`; POS: `pharmacist / Test@1234` → "Branch 1 - Al Wakra" → PIN 1111. Report: Invoicing > Reporting > Sourcing Margin Analysis (Invoicing users and Accounting managers).

Re-run the tests:

```
... -d alfiafy20_test -u alfiafy_partner_sourcing --test-enable --test-tags /alfiafy_partner_sourcing --stop-after-init
```

Install on another database: add `testalfiafyvet` to the addons path and install `alfiafy_partner_sourcing` (it pulls in alfiafy_purchase and alfiafy_product_base).
